Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE ____ MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

The information disclosure statement and declaration filed January 21, 2004 have been received.

Drawing

An Official Draftsman has approved the drawing, however, the drawing is blurred and grainy. It is suggested that Applicant file a replacement drawing.

Objection to the Disclosure

37 CFR 1.163

The following is a quotation of section (a) of 37 CFR 1.163:

(a) The specification must contain as full and complete a disclosure as possible of the plant and the characteristics thereof that distinguish the same over related known varieties, and its antecedents, and must particularly point out where and in what manner the variety of plant has been asexually reproduced. In the case of a newly found plant, the specification must particularly point out the location and character of the area where the plant was discovered.

35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

In plant application filed under 35 U.S.C. 161, the requirements of 35 U.S.C. 112 are limited.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

As specific to United States Plant Patent applications, the specifics of 37 CFR 1.164

(reproduced below) are controlling:

Art Unit: 1661

The claim shall be in formal terms to the new and distinct variety of the specified plant as described and illustrated, and may also recite the principal distinguishing characteristics. More than one claim is not permitted.

In plant applications filed under 35 U.S.C. 161, the requirements of 35 U.S.C. are limited. The following is a quotation of 35 U.S.C. 162:

No plant patent shall be declared invalid for noncompliance with section 112 of this title if the description is as complete as is reasonably possible. The claim in the specification shall be in formal terms to the plant shown and described.

The disclosure is objected to under 37 CFR 1.163(a) because the specification presents less than a full and complete botanical description and the characteristics which distinguish over related known varieties.

More specifically:

- A. Page 2, lines 4 and 9, the botanical classification "*Dendranthema grandiflora*" should be changed to -- *Chrysanthemum morifolium* --. The name has now been restored back to *Chrysanthemum morifolium* (See Brummitt). Correction is necessary.
- B. Applicant must set forth in the specification a brief description how the new variety is distinguished from the male parent, P311D4.
- C. Applicant is requested to cite in the specification the U.S. Plant Patent Number of the comparison cultivar Scott.
- D. If available, Applicant should set forth in the specification the petiole's diameter and surface texture.

Art Unit: 1661

E. If available, Applicant should set forth in the specification the diameters of the peduncle and pedicel.

F. Page 6, lines 13 and 18, the recitation "medium" is vague and does not adequately describe the strength of the peduncle and pedicel. Terms such as weak, strong, moderately weak, etc. should be imported into the specification.

G. Applicant should set forth in the specification a botanical description of the corolla tube's average size (length and diameter) and color designation (inner and outer surface) with reference from an employed color chart.

H. Applicant should set forth in the specification the average size of the ray floret tip or spoon.

I. Page 7, lines 22 and 28, the greater than symbol ">" is unclear and does not quantitatively describe the number of pistils per ray florets and disc florets.

J. If available, the applicant should set forth into the specification the lastingness and persistence of the bloom.

The above listing may not be complete. Applicants should carefully compare the claimed plant with the botanical descriptions set forth in the specification to ensure completeness and accuracy and to distinguish the plant within this expanding market class.

Art Unit: 1661

Any further botanical information should be imported into the specification, as should any additional or corrected information relative to same.

Claim Rejection

35 USC § 112, 1st and 2nd Paragraphs

Claim 1 is rejected under 35 U.S.C. 112, first and second paragraphs as not being supported by a clear and complete botanical description of the plant for reasons set forth in the Objection to the Disclosure Section above.
